

Clark Forklift

Clark Forklift Forklift Training - Performing globally, there are at this time 350,000 Clark forklifts and lift trucks in operation, with more than 250,000 of those operating in North America. Clark has five major lines of forklifts across the globe, making it one of the most expansive companies in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, covers more than 120,000 specific components designed for 20 exclusive models of forklifts and automated equipment. Your regional Clark Supplier is your complete source for availability of all your parts requirements supplied by Clark Totalift.

Clark has a phenomenal Parts Distribution team. The parts warehouses are conveniently situated in Changwon, South Korea and Louisville, Kentucky to guarantee exceptional service to both their buyers and their sellers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Driven to provide the highest level of value and service to our customers, Clark remains on the cutting edge when it comes to enhancing output and benefiting performance.

Globally, Clark has one of the most amazing dealer support networks. With over 550 locations globally, dealer representation in over 80 nations and 230 locations in North America, their high level of commitment to their clients predominates the material handling industry.

Clark proudly remains an innovative leader of the industrial equipment industry, revolutionizing safety features such as the worker restraint system. This exceptional dedication to safety is at this time a customary feature on every forklift.

Clark has a uncompromising objective to have the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be globally certified with quality standard ISO 9001 in all of its manufacturing plants. Furthermore, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be prepared for any number of environmental restrictions, thus placing them in a prevailing market position.

Lean Production

Clark has selected the system of "Lean Manufacturing" at all of its assembly facilities because this method is extremely economical and permits minimal use of resources. Developed to ensure maximum efficiency, this system is designed to find and acknowledge the most effective ways for manufacturing plant stewardship. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies.

Engine Design

Clark's product engineers and suppliers communicate together to improve the efficiency and brilliance of their merchandise while minimizing expenses. The new value engineering agenda combines innovative product development and offers improved consumer support and service within the industry.
