Forklift Training Guidelines
The checklist below is vital for whatever workplace that has lift trucks on the premises. Each of these questions must be answered with "yes" if all the safety regulations and rules are being followed. A "no" to whichever question indicates a procedural weakness which might lead to injury, damage to machine or accident.

1) Is the operating area of the forklift separate from the traffic of pedestrians?
2) Is pedestrian access to travel areas of the forklift restricted by barriers?
3) Are pedestrian walkways well marked and provided?
4) Are "forklift in operation" signs visibly clear?
5) There are mirrors provided at blind spots for operators and pedestrians?
6) Are alterations to daily forklift schedules communicated to all affected employees?
7) The forklift tires being used are suitable for all operating surfaces?
8) Is the seatbelt being utilized?
9) Is the seat in good condition?
10) The maintenance schedule of the forklift is being followed?
11) Is an annual forklift certification and inspection carried out?
12) Is the type of forklift right for the tasks?
13) Does forklift has a readable load chart?
14) Could the operators understand and read the load chart?
15) The chart lists the safe lifting capacity for all attachments and their uses?
16) Are the warning devices on the forklift working correctly?
17) Is the operating speed control device fitted correctly?
18) The lift truck overhead cage is fitted right?
19) Have all lift truck operators acquired certification?
20) Warning signs and speed limits are being observed?
21) Are forklift operators up to date on training for all kinds of lift trucks being utilized?
22) Forklift operators know their responsibilities to report the damage to the equipment and other forklift accidents?
23) Is the pre-test checklist reviewed on a daily basis prior to the equipment being utilized?
