## **Moose Jaw Boom Lift Operator Training**

Moose Jaw Boom Lift Operator Training - The cherry picker work platform is a type of work platform, which would normally consist of a bucket or platform at the hydraulic lifting system's end. The machine is also known as a man lift, boom lift, hydraladder or basket crane.

The bucket of platform is sometimes mounted to or set unto a truck or other vehicle and is sometimes referred to as a bucket truck. Other vehicles which could be made use of are self-moving platform, stand-alone trailers or flat back pickup vans. The one working stands and begins working in the bucket. The person inside the bucket usually includes an upper set of controls allowing control of the bucket's position. The reach of the bucket can be extended on some models by telescoping to adjust the lifting arm. Safety controls that are automatic prevent tipping. Articulated boom lifts are suggested for working in tight spaces or when it is necessary to clear obstacles.

As the name suggests, cherry pickers were constructed for picking fruit at high levels in trees. Cherry pickers are utilized in different other businesses, like mining, exterior painting and construction. Occasionally they are used for cleaning windows on high building. The devices are used to service cable television, electrical equipment and telephone on utility poles. Fire fighters occasionally utilize cherry pickers, called snorkels, when ladders are insufficient. At Christmas season, civic workers can be seen hanging banners and lights in cherry pickers.

## **Boom Lift Operator Safety Training**
