Moose Jaw Order Picker License

Moose Jaw Order Picker License - Order picking is also referred to as order preparation operation. This is among the chief processes in a warehouse and consists of people referred to as order pickers, taking and collecting articles in a specific quantity prior to shipment so as to accomplish client orders. Order picking is an easy warehousing method. The efficiency in which this particular task is accomplished can be directly connected to the productivity of a supply chain. Hence, order picking is amongst the most controlled logistic processes. Order picking falls in the category of the warehouse management system.

There are specific types of order picking which comprise: pick to box method, wave picking method, piece picking or picker to part method, sorting systems method and zone picking method.

The pick to box method consists of the order picker filling the box with the things from his or her station. The box then moves to the other picking stations until the customer order is done. In this method, there is no movement of the order picker employees. In the wave picking method, the order pickers move round to be able to gather the required things for some orders. The picker to part method or piece picking is similar where the order pickers or picker move to gather the stuff needed but for one order only.

There is no movement by the order picker in the sorting systems method. Rather, products are brought to the orderpicker by an automatic system like a conveyor system or an automatic storage system. In the zone picking method, each order picker is assigned to one specific zone. They are responsible for just realizing order picking in this particular zone.
