

Moose Jaw Manlift Ticket

Moose Jaw Manlift Ticket - The Manlifts and Elevated Platforms program provides training on the rules, regulations and correct application of safe operating measures and work practices involved in daily activities for individuals who work using this machine. The program has been designed for individuals who are actively involved in these activities or those who have a basic knowledge of this machine.

manlifts and aerial platforms have become integral and common equipment in industrial settings in the past few decades. These equipment provide an easy way to lift employees close to what must be performed on a stable platform apparatus, enabling employees to perform tasks with greater comfort and safety rather than being perched on top of ladders or scaffoldings.

The manlift is similar to other industrial tools in that they are safe when utilized correctly. Because they lift workers above floor or ground level, accidents can easily take place and this could result in serious death or injuries for both the manlift operators and whoever passerby who might not be lucky enough to be standing beneath.

There are a variety of models of manlifts. Most fall into 1 of 2 categories: the articulating boom lift, which has the capability of both vertical and horizontal movement and the scissors lift, that is capable of moving upward and downward.
